CAREER OBJECTIVE: Looking for a challenging role in a reputed company to keep on enhancing my knowledge, skills and experience as a continuous learning process as well as to utilize them effectively and efficiently in order to achieve organizational goals**.**

Skills/Technologies

Core Skills:
C#, Dotnet core, Angular, Web API , Asp Dot net Core MVC, MS Sql And WPF

Computer Language:
C#, Type script, VB, Java Script

Windows UI:
WPF, Windows form

Web Languages(Markup):
HTML 5, XML, CSS, TS

Object Orientation:
UML, Design patterns

Web Technologies:
.NET Framework/Dot Net Core/ MVC /Web API, Windows Service, Angular

Databases:
MS SQL Server, My SQL, Postgres

Source Control:
Visual Source Safe (VSS), Perforce, JIRA, GIT & Stash, Azure Dev ops

Domain:
Automobile, Publishing, Capital Market & Retailing.

Other Tools:
Redis, NServicebus, SonarQube, Rabbit MQ and Docker.

Knowledge of Azure Cloud, Python, React Js and Java

Education

MCA: IGNOU
B.SC: CCS University

Certification

MCP: MS SQL Server
SCJP: Sun Certified Java Developer
GNIIT: NIIT Certification.
GENPACT Green Belt Certified.

SUMMARY

- .NET lead having experience of **14 years** with full-stack development. Strong software development expertise in designing, coding of Window and web based applications using emerging technologies.
- Proven ability with code development & leading project teams to successfully develop and deliver required software solutions.
- Proficient in driving and handling projects independently including the Client interaction.
- Experience in JIRA, Agile, Perforce, VSS and GIT HUB.
- **Excellent team player** with problem solving and troubleshooting capabilities.
- Excellent **result-driven**, hardworking nature, **organizational skills**, I have the ability to perform tasks under pressure and executed projects within the estimated timeline.
- Knowledge of handling project related documents like Car, Estimation sheet, PMP, PIDT and other CMMI documents.
- Lean and GB certified.
- Constantly upgrading and learning new skills and technologies.

PROFESSIONAL EXPERIENCE

R-Systems International Project Leader	**Oct 2021 – Till Date**
Genpact headstrong Consultant	**Oct 2016 – Oct 2021**
Thomson Digital Sr. Software Engineer	**May 2013 – June 2016**
SATC Marketing Software Engineer	**June 2011 – May 2013**
Enopia Technologies Software Engineer	**Sep 2009 – June 2011**

End Client: DFX
Project: Reuben Dfx
Description: It is the set of projects used for Repair order management to automate automobile service process. It includes Template manager, Inspection manager, RO Management, Customer portal and many others Api's, portal and tools.
Responsibilities: • Coordinate with client while new requirement gathering, daily progress report, Code review, Handling the team issue and production bugs. Involved in design architecture of new projects and development.
Environment: Dot Net core Web Api, EF Core, Postgres, MS SQL, Angular, Window 11, GIT, AZ Dev Ops. Redis, NService bus, Docker, Jira and Sonar Cube.

End Client: DFX
Project: Schedule Anywhere
Description: SA is a web based portal for appointment scheduling for car services.
Responsibilities: • Coordinate with client while new requirement gathering, daily progress report. Handling the team issue. Involved in development and bug fixes.
Environment: Dot Net core MVC 3.1, Web Api , EF Core, Angular 12,Window 10, GIT, AZ Dev Ops.

End Client: Morgan Stanley (USA)
Project: Portfolio Work Station (PWS)
Description: Web Based portal provide support for bellow task. EMS: An error management system. Poster: A transection posting tool. Cost basis import tool: a tool for implementing cost basis update request.

Accounts module manager: Clone, update and delete a account in GIM2.

Investment Summary: A summary of activities for an account.

DQ tools: a tool for maintaining data quality with in portfolio system.

Responsibilities:

- Coordinate with client while new requirement gathering, daily progress report. Handling the team issue like developing, debugging and unit testing of the application.
- Handling all CMMI documents like Tracker, PMP, PDP, Estimation, HM workbook and coordinate project audits.

Environment: ASP Dot Net core Web Api, Angular 7,EF Core, MySQL 8.0, VS 2019, Window 10, GIT, Jira, Train

End Client: Morgan Stanley (USA)
Project: Dremel
Description: Dremel is a web based portal for data extraction. Generates various customize reports for PWM Operation user. It can provide flexible reports in terms of Position, Transections and Portfolio performance.
Responsibilities: - Coordinate with client while new requirement gathering, daily progress report. Handling the team issue like developing, debugging and unit testing of the application.
Environment: Dot Net core MVC 3.1 , EF Core, VS Code, Window 10, GIT, Jira, Train Etc.

End Client: Morgan Stanley (USA)
Project: CPP (Client Preference Portal)
Description: This application is the migration of S2CDS (Wpf dot net UI legacy).The SPA used to manage reference data of credit confirmation. Application is managed by E3 entitled groups and having approval flow. It has around 20+ screens. It having a reusable component that uses thunderhead smart Editor and used by many other projects.
Responsibilities: - My major responsibilities are to ensure code quality, performance, architecture designing and Database designing. Resolving the blockers of the team members. Ensuring timely delivery.   - Class Diagram & Sequence Diagram. Worked on core module (Create DAL, Business Layer).   - Coordinate with client while new requirement gathering, daily progress report. Handling the team issue like developing, debugging and unit testing of the application. Write NUnit test case.
Environment: C#, Angular2, Web Api 2.0, Type script, VS 2015, Sql Server 2012

End Client: Morgan Stanley (USA)
Project: OTC Trade confirmation system- TRIPOD
Description: TRIPOD is a platform where OTC(Over the counter) trades are matched and confirmed through various asset classes. There are various kinds of trades which are supported through Tripod and those are: Interest rate derivative, equity derivative, Credit, FX and commodity.   Trades could be processed either through text or electronic channel. Once processed or confirmed through any of the channel, the legal contract between the counterparties is stored in Tripod.   TRIPOD delivers the following features: - Routing the trades to different asset classes   - Trade processing in various channel   - Confirm generation in channel   - Matching of the trades in channel   - Indexing and affirmation in case of text channel   - Support for inbound and outbound documents

Responsibilities:
- Coordinate with client while new requirement gathering, daily progress report. Handling issue like developing, debugging and unit testing of the application.
- Provide production Support

Environment: Visual Studio 2015, C#, WPF, Sybase, NUnit, CAB, JIRA, GIT, Infragistics and Web api

End Client: Morgan Stanley (USA)
Project: Performance Reporting Client-POD
Description: POD (Portfolio on Demand) is the migration of the legacy application into new platform and language. This application is used under one of the major pillars in Capital markets Wealth Management in Morgan Stanley. Used to generate different reports.
Responsibilities: • I have worked on code migration from VB to C# as Lead Consultant. • I worked on Infragistics Grid. Multiple Reports. Perform code reviews for team member. • Coordinate with client while new requirement gathering, daily progress report. Handling the team issue like developing, debugging and unit testing of the application. Provide production Support
Environment: Visual Studio 2015, C#, Win form, Infragistics Grid.

End Client: Elsevier Books(USA)
Project: CMS
Description: CMS, content management system is an intranet project of Thomson digital. That takes care of all process flow. The row material flows from different department and finally the product is delivered to the client. It may be epub files, PDF's, mobi files or any kind of E- learning Material. There are client wise flow definition and complex business logic. It have features like load balancing. Real time tracking of Work in process and many other MIS reports. It has various other auto services like auto pagination, In-design, Validation, eproofing and others.
Responsibilities: • Front end and back end development. • Maintenance and support.
Environment: C#, Asp MVC, Sql Server 2008, WCF, MSMQ, Window services, Linq, Entity frame work, Log4net.

Other key projects	Description	Technologies
Elsevier Billing System	It is an intranet web application used to generate bills and monthly WIP for inflow and out flow items. The system is the part of CMS. It contains various features like option for expiration. Monthly Billing, Article in production, Location wise billing, On hold articles and many other MIS reports.	C#, MVC 4, Jquery , Xml, Linq, Entity Frame Work
EPub Automation	It converts a set of xml files in to format known as epub and mobi. First it convert the xml files into html5 pages according to some set of rules then it format the content, set the floats and apply CSS to each page. It manages all type of multi, cross references. Generates bibliography pages etc. It generates supporting file like Index page, cover page, Title page, NCX and OPF files. It provides editor to correct the content of HTML5 output if anything is wrong and finally generates the epub file for all HTML5. After generation epub it run validation tool on it to verify any kind of error before delivery.	C#, Wpf, MVVM, Xml, Linq, Sql server, Xpath.

Eproofing System	This is a web site provided to client to check there proofs and provide feedback on it. It works with a console application, The application generates annotated pdf and generates mail body and link to the respective client according to flow of book there are two basic types of flows AU-ED-MC or AU-MC. Once the author makes changes with provided PDF automatic mail is generated to Editor of the book now he makes changes to the proofs. Proofs can be the whole book or a single chapter. Finally it is deliver to master copy editor for final deliverables.	C#, asp.net, Sql server 2008,Console Application, Jquery
Retail World	It is window based retail Automation system is designed to automate the Retail industries Requirements. Systems special features like barcode capabilities, well enhanced reporting system and integrated browser based help. Other features like Scheme Engine, Sales Order, Multiple Discount ,Sales Analysis, Multiple payment options, Sales Return Analysis ,Goods Movement ,Sales Modification History Stock Adjustment ,purchase Order ,Purchase analysis, Credit Note, Sale tax analysis, UOM conversion ,Currency conversion ,Cost manager ,Accounting Voucher, Accounting Statement, Balance Sheet, P&L, Proper backup and many more.	Vb.net, SqlServer 2005,Crystal report, ADO.net

PERSONAL PROFILE

Father's Name   : Mr. Raj Veer Singh Kamboj
Marital Status   : Married
Address   : Noida
Phone   : 9212291014/9013129820
